PROFESSIONAL SUMMARY

Results-driven Full Stack Python Developer with expertise in Python, Django, Django REST Framework, React, PostgreSQL, AWS, and Docker. Experienced in developing scalable web applications, secure REST APIs, and responsive frontend interfaces. Strong knowledge of backend architecture, API integration, database optimization, and clean coding practices with a focus on performance, reliability, and maintainability.

TECHNICAL SKILLS

Backend: Python, Django, Django REST Framework (DRF), SQLAlchemy, Celery, Django Channels, LangChain, LangGraph

Frontend: React, Redux, Tailwind CSS, JavaScript, HTML, CSS, Axios

AI & LLM Tools: Groq (Llama 3), Ollama, Prompt Engineering, ATS Optimization Systems

Databases & Caching: PostgreSQL, ORM (Django ORM), Redis

Messaging & Async: RabbitMQ, Pika, Celery

Cloud & DevOps: Amazon Web Server (AWS), Azure, Docker, Kubernetes, Nginx, Vercel, Netlify, Render, PythonAnywhere

Tools & Practices: Git, GitHub, Jira, Postman, Swagger (OpenAPI), Pytest, Boto3, Jinja2, RESTful API Development, Microservices Architecture, API Integration

PROJECTS

Aivent, *Universal Event Operating System*

- Built a full-stack AI-driven event platform supporting vendors, customers, and admins.
- Developed a microservices backend using DRF, PostgreSQL, RabbitMQ, and Docker Compose.
- Created a responsive frontend with React 19, Vite, and Tailwind CSS using JWT and OAuth authentication.
- Automated async workflows with Celery and AWS SQS, improving task reliability by 40%.
- Containerized and deployed 5+ services with AWS and Kubernetes-ready configurations.

Resiko, *AI-Powered Resume Optimization Platform*

- Built a multi-agent ATS optimization system using LangGraph, Groq (Llama 3.3), and FastAPI for real-time resume analysis.
- Developed backend services with FastAPI, PostgreSQL, SQLAlchemy, and Server-Sent Events (SSE).
- Implemented an iterative Plan → Modify → Rescore workflow to improve ATS matching scores.
- Added Missing Skills Analyzer and automated PDF/LaTeX resume generation.
- Created a responsive frontend using React 18, Vite, and Tailwind CSS with transparent AI decision tracking.

HopyfyCart, *E-Commerce Platform*

- Built a scalable e-commerce platform using React, Redux, and Tailwind CSS with responsive UI design.
- Developed 10+ RESTful APIs using Django REST Framework and PostgreSQL with Razorpay payment integration.
- Deployed and optimized the application on AWS EC2 and S3, reducing asset load latency by 20%.

PROFESSIONAL EXPERIENCE

Bridgeon Skillvercity LLP, Calicut, <i>Python Full Stack Developer</i>	2025 – Present
• Developed REST APIs using Django and DRF for authentication and backend workflows. • Built 8+ responsive UI components using React, Redux, Tailwind CSS, and Bootstrap. • Implemented JWT authentication and email verification for secure access control. • Optimized Django ORM queries and PostgreSQL performance, improving API response time by 20%. • Integrated Razorpay payment gateway and documented 15+ APIs using Swagger. • Collaborated using GitHub workflows in Agile development environments.	

EDUCATION

Bachelor of Computer Application, IGNOU University	07/2025 – Present
Higher Secondary Education, PKMMHSS Edarikode	06/2023 – 03/2025

CERTIFICATES

- Prompt Engineering for Everyone** – IBM Developer Skills Network (Apr 2025)
- Generative AI Mastermind** – Outskill (2025)
